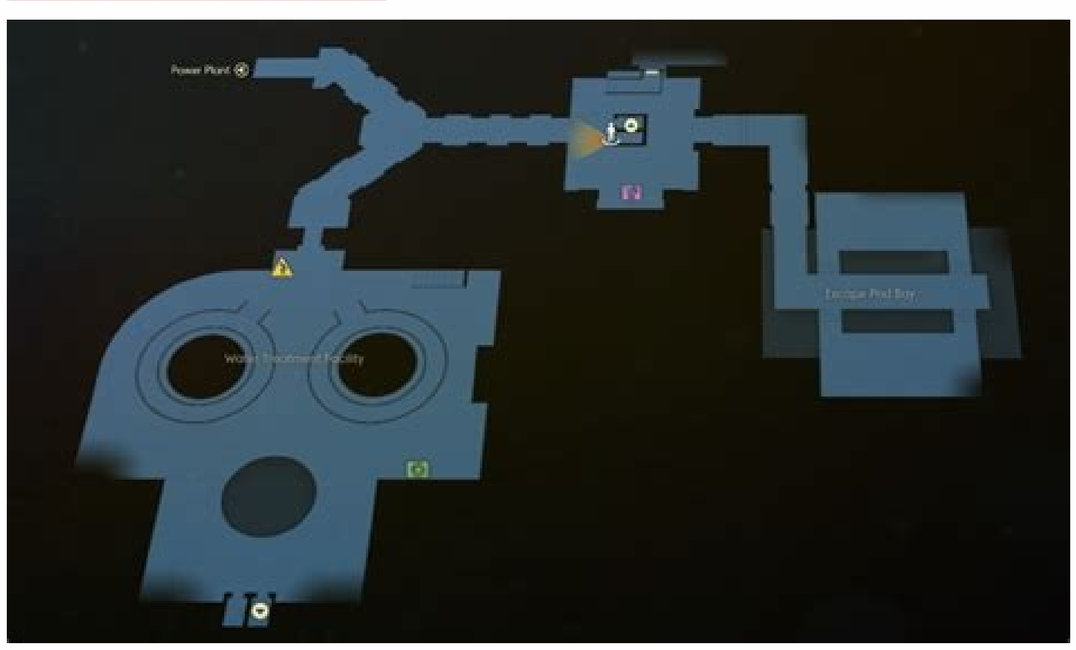
Prey water treatment power



Water treatment plant power prey. Prey water processing power. Prey life support water treatment power. Turn on power water treatment prey. Water treatment facility prey power.

There is a note in a console right next to the door with a key code of the storage cabinet. Return to the ground level of the water treatment facility, and say to the front door, which has no energy. That's it. So, until you find out somewhat more, you are out of options. If you want to run and do it now, yes free. Cooling chamber is very easy to get distracted here, there is a lot to do and many levels that explore. Once the splice is repaired, check the computer in the center of the console looking for a transcribe and some emails. Behind the gravitational elevator there is a corridor that leads to the non-functional escape pod bay. We did it first because we did not know how long it would take «reboot», so if you are an explorer or simply play slowly, it may be better to go back before you distracted yourself. You can use the maintenance access tunnel to jump down the hall or cross the Gloo. Use the gateway to cross all the way to the other side where the elevator shaft is. Turn left from the fan control computer and make your way around the catwalk. Loot anything other than you see, especially the labels of typhs and the manufacturing plans of Disruptor Batteries, on the way to see Mikhaila Ilyushin. There is another door closed on the other side of the room. This will expose six switches on the console. If you have hacking 2, you can use the computer to check some emails, download the area from the area and open the door in front of you. Reactor control room There is a manufacturer immediately on your left when you land. Go down the left corridor in place, towards the installation of water treatment. This (finally) will open the door to the electrical plant. Back outside, head to the bath before exploring the salon of the safety cab. you get to the other side of the loading screen, you will receive a call from Mikhaila Ilyushin, and she will give you a solution to your problem. Either way, be sure to check all the bodies in the hallway for the button “, the corpse of Erica Tegue has a security. security. Secure key code. This will leave you in the hallway on the other side of the locked door. Turn right and enter the raped offices. There’s no trick, you just have to access the room. Monitoring station There is a waste picker on the ground floor of this room on the left side. When you’re done, go back out and carefully go back down to the catwalk where you started. Fixing or replacing the deflector of the damaged reactor There are several deflectors you can reach. There’s a closed door on the back that you won’t be able to open until later. Parts storage room Let’s get to the parts storage room first. The maintenance elevator on the right is pretty damaged, so you can ignore it for now. There’s a ghost waiting on the other side of the door when you open it. Place all the way to the lowest part of the room. Access the Salt Reactor Control Room through the side door on the left of Mikhaila. Complete the restart sequence and restart Talos Power Plant Return to the Reactor Control Room and press the button. The trick is to fire your GLOO cannon to the ground as close to the intersection as possible. There you will find a computer that controls the air flow in the station. While you’re here, check your e-mail, and keep an eye out for a floating neuromod. Handle the corrupt operator inside, then ransack the lockers. You can use the stairs in the front left corner to climb the walkways (if you have fallen to the ground). Continue down the hall and into Talia’s office to find a couple of psi hypos. There is an electric arc junction electrifying some steps. Take one of the two detours and return to the ground floor. Use the turret to help him get it out, then explore the room, collecting everything. This will make you win the trophy/achievement of “A Friend in Need” as well. Take the medicine to Before you leave, go to the hall to look for two more neuromods. more.
